Professional Summary

Full Stack Web Developer trained at UCLA who loves solving the puzzles and challenges of seeing a project go from an idea to a fully functional and polished application. Enjoys working at companies where collaboration and acquiring new knowledge occurs daily. Strengths in problem solving, time management, and teamwork.

Technical Skills

Languages: HTML5, CSS3, Javascript

Tools/Frameworks: MongoDB, Firebase, JQuery, Bootstrap, MySQL, Node Js, Express, Handlebars.js, ReactJS, and Redux

Projects

Roadtrip App | [Github link](#) | [Heroku Deployment](#)

- This project is designed for people who want to plan their next road trip. After choosing your desired number of stops, Roadtrip Planner will show you the quickest route, high rated restaurants near your desired stops, and notify you when another user is planning a similar trip.
- My responsibilities were to incorporate the Google Maps Directions Service, Distance Matrix, and Google Places API's into the application. I also contributed to the styling of the application using CSS and Bootstrap.
- This app uses MongoDB, Express, ReactJs, NodeJs, the Yelp API, Google Maps API, and [socket.io](#)

Travelligence | [Github Link](#) | [Heroku Deployment](#)

- This project is travel application for people who can't decide where to take their next vacation. The application prompts the user to fill out a simple sign up form and our algorithm utilizes data from the users location, estimated age, estimated culture, and a few uploaded photos to recommend a country to visit.
- My responsibilities included setting up an authentication program to sign up and login users, as well as developing the code to the location and age aspect of the travel algorithm
- This app uses Javascript, Express, Sequelize, Node Js, Handlebars, passport authentication, and Microsoft Computer Vision API

Experience

Logix Federal Credit Union- Newbury Park, CA

May 2019- February 2020

- Handled loan payments, Wire payments, transfer of funds, mortgage payments, and balanced ATM machines
- Consistently outpaced referral goals every week by 50%
- Contributed to boosting branch Net Promoter Score (NPS) by 3%
