## Professional Summary

Full Stack Web Developer who loves solving the puzzles and challenges that come about from building a polished application with exceptional UI/UX. Enjoys working at companies where collaboration and acquiring new knowledge occurs daily. Strengths in adaptability, time management, and collaboration.

## Technical Skills

**Languages:** HTML5, CSS3, Javascript

**Tools/Frameworks:** Git, MongoDB, Firebase, JQuery, Bootstrap, MySQL, Node Js, Express, Handelbars.js, ReactJS, and Redux

## Projects

**Roadtrip App** | [Github link](#) | [Heroku Deployment](#)

- This project is designed for people who want to plan their next road trip. After choosing your desired number of stops, Roadtrip Planner will show you the quickest route, high rated restaurants near your desired stops, and notify you when another user is planning a similar trip.
- My responsibilities were to incorporate the Google Maps Directions Service, Distance Matrix, and Google Places API's into the application. I also contributed to the Database Architecture and styling of the application
- This app uses MongoDB, Express, React.js, Node.js, Bootstrap, the Yelp API, Google Maps API, and [socket.io](https://socket.io)

**Pool-Lane Reservation App** | [Github Link](#) | [Heroku Deployment](#)

- This application allows users to reserve a time for pool lane swimming. The app also contains an admin portion with the purpose of viewing, editing, or deleting any of the database reservations.
- To view Admin portion please sign in with the Email: [asoudani@icloud.com](mailto:asoudani@icloud.com) and Password: password
- This app uses MongoDB, Express, React.js, Node.js, Firebase Auth, and Bootstrap

## Experience

Pandemic Relief Supply - Full Stack Developer (Contract)

*October 2020- November-2020*

- Built Inventory Management tool to be used by employees on the ground
