## Professional Summary

A recent graduate at the UCLA Ext. Full Stack Coding Bootcamp who loves solving the puzzles and challenges of seeing a project go from an idea to a fully functional and polished application. I have enjoyed working at companies where collaboration and acquiring new knowledge occurred daily. My next desired role would be as a Jr Full Stack Developer so that I may continue to learn and grow in my desired profession.

## Technical Skills

**Languages:** HTML5, CSS3, Javascript

**Tools/Frameworks:** MongoDB, Sequelize, Firebase, JQuery, Bootstrap, MySQL, Node Js, Express, Handlebars.js & ReactJS

## Projects

**Roadtrip App** | [Github link](#) | [Heroku Deployment](#)

- MERN application utilizing the Yelp API, Google Maps API, and [socket.io](#)
- My responsibilities were to incorporate the Google Maps Directions Service, Distance Matrix, and Google Places API's into the application. I also contributed to the styling of the application using CSS and Bootstrap.

**Travelligence** | [Github Link](#) | [Heroku Deployment](#)

- This project is travel application for people who can't decide where to take their next vacation. The application prompts the user to fill out a simple sign up form and our algorithm utilizes data from the users location, estimated age, estimated culture, and a few uploaded photos to recommend a country to visit.
- My responsibilities included setting up an authentication program to sign up and login users, as well as developing the code to the location and age aspect of the travel algorithm
- Used Javascript, Express, Sequelize, Node Js, Handlebars, passport and geoip-lite npm packages, and Microsoft Computer Vision API
