Professional Summary

Full Stack Web Developer trained at UCLA who loves solving the puzzles and challenges of seeing a project go from an idea to a fully functional and polished application. Enjoys working at companies where collaboration and acquiring new knowledge occurs daily. Strengths in problem solving, time management, and teamwork.

Technical Skills

Languages: HTML5, CSS3, Javascript

Tools/Frameworks: Git, MongoDB, Firebase, JQuery, Bootstrap, MySQL, Node Js, Express, Handelbars.js, ReactJS, and Redux

Projects

Roadtrip App | [Github link](#) | [Heroku Deployment](#)

- This project is designed for people who want to plan their next road trip. After choosing your desired number of stops, Roadtrip Planner will show you the quickest route, high rated restaurants near your desired stops, and notify you when another user is planning a similar trip.
- My responsibilities were to incorporate the Google Maps Directions Service, Distance Matrix, and Google Places API's into the application. I also contributed to the styling of the application using CSS and Bootstrap.
- This app uses MongoDB, Express, React.js, Node.js, Bootstrap, the Yelp API, Google Maps API, and socket.io

Pool-Lane Reservation App | [Github Link](#) | [Heroku Deployment](#)

- This application allows users to reserve a time for pool lap swimming. The app also contains an admin portion with the purpose of viewing, editing, or deleting any of the database reservations.
- To view Admin portion please sign in with the Email: asoudani@icloud.com and Password: password
- This app uses MongoDB, Express, React.js, Node.js, Firebase Auth, and Bootstrap

Google Books App | [Github Link](#) | [Heroku Deployment](#)

- This application uses the google-books API to allow users to search and save books.
- This app uses MongoDB, Express, React.js, Node.js, and Bootstrap

Experience

Pandemic Relief Supply - Full Stack Developer (Contract)

October 2020- November-2020

- Built Inventory Management tool to be used by employees on the ground
- Allowed employees to edit and add new price points, minimum order quantities, and amount in stock for each vendor
- Utilized a stack that included React.js, Redux, MongoDB, Express.js, Node.js, and Reactstrap

Education

UCLA Full Stack Coding Bootcamp

February 2020 - August 2020

Certificate in Full Stack Development

San Diego State University,

September 2014 - May 2018

Bachelors of Arts in Economics
